Complete React Developer in 2022
(w/Redux, Hooks, GraphQL),Udemy

ABOUT ME

Hi , I am Ahmed. I work as a front-end developer for more than 10 months. I have many skills such as html, css, javascript, sass, bootstrap and React. js in addition to handling the api.

I have many previous works and websites with attractive designs so make sure to watch them I will be happy if you do this and I will be more happy if you contact me

PROJECTS

A Book tracking App

The application contains 3 shelves
first shelf contains books that the user has not finished reading
second shelf contains books that the user wants to read
third shelf contains books that the user finished
application allows transferring books from one shelf to another and searching for books using the title of the book or the name of the author as well as adding the book to the appropriate shelf

React Js Html Css Api

Indecision App

Web Application Make your computer choose for you
The web application allows the user to enter a number of tasks or decisions (provided that the decisions are not empty or duplicate) and then the user presses the button to show the most recent decisions or tasks randomly, as well as save the tasks or decisions in the LocalStorage

React Js Css Html

And more, you can find it on my personal website
